

Ledranol 118

Ledranol 118 is a compounded fatliquor of high quality sulphated neatsfoot and synthetic sperm oil. It is designed for fatliquoring upper leathers where a greater resistance to discoloration by light is required.

Typical Analysis:

Charge:	Anionic
Active matter:	67%
Combined SO ₃ :	3.4 – 3.7%
pH (10% Solution):	6.0 – 6.5

Emulsion Characteristics:

10% in pH 4 buffer:	Stable
20°G Hard Water Stability:	Stable
30°G Hard Water Stability:	Stable

Shelf Life:

6 - 12 months when properly stored

Application:

Ledranol 118, because of its excellent light fastness is highly recommended for white full grain, suedes, and split leathers. It penetrates well into leathers, giving a high degree of fiber lubrication with a clean and buffable surface. The amounts used will depend on the type of leather and fatliquoring effect required.
