

## **Ledranol CM**

Ledranol CM is a semi-synthetic fatliquor developed as a general purpose fatliquor for all types of leathers. Ledranol CM is based on sulphated synthetic oils, hydrocarbon and bisulfited marine oil. Ledranol CM also displays very adequate light fastness properties.

### **Typical Analysis:**

Charge:	Anionic
Active matter:	60– 62%
Combined SO <sub>3</sub> :	2.5 – 3.2%
pH (10% Solution):	6.0 – 6.5

### **Shelf Life:**

Optimum performance and shelf life are maintained when stored near room temperature. Keep from freezing or overheating.  
6-12 months when properly stored.

### **Application:**

Ledranol CM is a fatliquor for all types of leathers. Ledranol CM has been found to be especially suitable for lining leather. Ledranol CM is compatible with all Anionic fatliquors and may be used in combination with other Ledranol brands of fatliquors.
