

Ledranol EM

Ledranol EM is a combination fatliquor based on lecithin and synthetic components.

Ledranol EM produces very soft leathers designed for furniture, softy napa, suede and garments.

Typical Analysis:

Charge:	Anionic
Active matter:	80 – 82%
PH (10% Solution):	6.5 – 7.5

Shelf Life:

All fatliquors are emulsions and may separate over time. This is normal. Mix well before use, and they will perform properly.

Optimum performance and shelf life are maintained when stored near room temperature. Keep from freezing or overheating.

12 months when properly stored.

Application:

Ledranol EM is an excellent fatliquor for medium soft to very soft leather by varying the percent of the offer.

Ledranol EM has a high compatibility with various natural raw oils and mineral oils, or with other Ledranol fatliquors and retanning agents.

Ledranol EM gives a warm and very smooth rich wet touch surface feel, with no greasiness.

Ledranol EM has outstanding softness, lightweight character and excellent milling-properties.

Ledranol EM has excellent distribution on the leather producing a more uniform temper and color, with very little bleaching.
