Application:

Ledranol LS is an excellent fatliquor for every type of leather, where medium soft to very soft leather is required. It gives a warm and very rich surface touch, with no greasiness. It has a high compatibility with other Ledranol anionic fatliquors.

Apply amounts depending on the type of leather desired. Ledranol LS can separate over time because of the high content of lecithin, this is normal and mixing well before use is required.
