

Ledranol 600-L

Leather chemicals · Fatliquor

Versatile fatliquor based on bisulfited high-quality fish oil, with excellent leather-softening properties and good penetration.

Typical analysis

Charge	Anionic
Active matter	70%
pH (10% solution)	6.0 – 7.0

Emulsion characteristics

10% in distilled water	Translucent, stable
10% in pH 4 buffer	Stable

Shelf life

6 to 12 months when properly stored. Mix well before use; keep from freezing or overheating.

Application

Ledranol 600-L has excellent leather-softening properties and penetrates the leather easily and uniformly. It suits all types of leather but is mostly used for glove, garment and upholstery leathers, especially where high tensile strength is required. The amount applied depends on the leather desired.
