

Ledranol 80-B

Leather chemicals · Fatliquor

General-purpose synthetic fatliquor, especially for white leather. Gives whiteness, softness, fullness, and a dry touch.

Typical analysis

Charge	Anionic
Active matter	75%
Combined SO ₃	3.5 – 4.0%
pH (10% solution)	5.5 – 6.5

Shelf life

Up to one year when kept near room temperature in well-conditioned storage.

Application

Ledranol 80-B imparts excellent whiteness, softness and fullness with a dry touch. Its very low iodine value means it does not promote oxidation, making it especially suitable for white and pastel-shade leather that must stay light-fast.
