

Ledranol CM

Leather chemicals · Fatliquor

Semi-synthetic general-purpose fatliquor for all leathers, especially lining leather. Good light fastness; compatible with anionic fatliquors.

Typical analysis

Charge	Anionic
Active matter	60 – 62%
Combined SO ₃	2.5 – 3.2%
pH (10% solution)	6.0 – 6.5

Shelf life

6 to 12 months when properly stored. Mix well before use; keep from freezing or overheating.

Application

Ledranol CM suits all types of leather and has been found especially suitable for lining leather. It is compatible with all anionic fatliquors and may be used in combination with other Ledranol fatliquors.
